LOFT / MID / SMART COLLECTIONS

miior IT WORKS.

LOFT / MID / SMART COLLECTIONS

Outstanding comfort, ease of use and great results thanks to the unique technology.

Unique Miiior mirrors make it possible to smoothly adjust the distance of the mirror surface from our face. It is just about pulling its frame. As also together with the mirror we bring closer its warm LED lighting, everything is under our control. The mirrors are equipped with an automatic, magnetic light switch what makes their use even more intuitive. And all this thanks to the unique, patented sliding system.

The use of our inventions results in a wonderful effect of your cosmetic treatments. Short-sighted ones will appreciate the end of dilemmas on how to do the make-up without glasses. At the end everyone will realize that the nuisance, and sometimes the discomfort of working in an inclined position has gone into past. A wide range of mirrors and award-winning design allow their use in the home bathroom or beauty corner as well as in public areas. Miiior pull-out mirrors conquer the world. Try them yourself!

Welcome to the world of Miiior!
